

WASEEM AL-BUQAI

Back-End Developer | PHP Laravel Developer

Damascus, Syria | waseemalbuqai@gmail.com | +963 992353153 | github.com/Wasem8

SUMMARY

Back-End Developer (PHP/Laravel) with 3+ years of project-based experience building real-world web applications and 30+ RESTful APIs. Strong background in Laravel 8–12, MySQL optimization, and Clean Architecture (SOLID, Service & Repository patterns). Experienced in delivering production-ready systems with role-based access control, background jobs, and real-time notifications.

TECHNICAL SKILLS

- **Programming Languages:** PHP (8+), SQL/MySQL, JavaScript (Basic), HTML, CSS
 - **Frameworks & Libraries:** Laravel (8–12), Blade, Bootstrap, TailwindCSS
 - **APIs & Backend:** RESTful APIs, Authentication, Queue Jobs, Queues, Caching, FCM, Third-Party APIs
 - **Databases:** MySQL, Database Optimization, Indexing, Transactions
 - **Testing:** PHPUnit, Feature Testing, TDD (Basic)
 - **DevOps & Cloud:** Docker, CI/CD (Basic), GitHub Actions, AWS (Basic)
 - **Tools:** Git & GitHub, Postman, VS Code, PHPStorm, Linux
 - **Architecture:** Clean Architecture, SOLID, MVC, OOP
-

PROJECTS

Complaint Management System (2025)

- Architected a scalable Laravel 12 backend supporting 3 user roles and 20+ database tables.
- Designed and exposed more than 15+ RESTful API endpoints used by web and mobile clients.
- Optimized system stability by managing concurrent updates using database locks and queued jobs.
- Enabled real-time communication by integrating Firebase Cloud Messaging for instant notifications.
- Established audit logging and complaint lifecycle tracking to improve accountability.
- Applied Clean Architecture, SOLID principles, and Service/Repository patterns to ensure maintainability.
- **GitHub:** [Wasem8/complaints-system](https://github.com/Wasem8/complaints-system)

Beauty Center Management System – Vera_Daraa (2025)

- Delivered a business management platform handling bookings, invoices, staff, services, and offers.
- Structured role-based access control for 3 distinct roles, improving data security.
- Automated background operations using queues, enhancing responsiveness during peak usage.
- Enhanced customer engagement via Firebase push notifications and booking alerts.
- **GitHub:** github.com/Wasem8/Vera_Daraa

Job Opportunities Platform | 2023

- Created a job marketplace connecting employers with job seekers.
 - Implemented advanced search and filtering mechanisms for job listings.
 - Managed authentication, authorization, and role-based access.
-

EDUCATION

B.Sc. Software Engineering — Damascus University (2022–2026)

Final Year Student – expected to graduate in 2026
